## About

The essence of the Gran School is that children will put into practice everything they learn. To do this, we create training kits, which we call Suitcases :))

Here are examples of learning by doing:

The child studies the movement of the sun's rays and then assembles a real telescope.

Children learn radio waves and at the end assemble walkie-talkies on which they can talk to each other.

The child studies thermal phenomena and then assembles a machine with a heat engine, thanks to which the machine goes!
